

Design Technology

Knowledge Building

Food Technology

Food technology is an area that focuses on the production, research, development, preservation and quality control of food products. It features a range of techniques in food preparation, as well as recognising the need for hygiene when working with food. Pupils will know where food comes from, how to prepare food safely, with and without a heat source, and finally explore different techniques used to make a wider range of dishes. There is a link with science here

Users and Purposes

In design technology, **users** are defined by the people who will use the product that is being designed. **Purpose** relates to designing solutions to improve people's lives. These two components need to work harmoniously together in order to create a design, and then, ultimately, a product that suits both. By making pupils aware of these two aspects, they can see how design technology evolves and develops until they recognise that some designs have impact beyond their intended **user and purpose**.

Product Research

Product research is the process of deciding which new products will be successful and then seeing how they could be developed. It can also involve looking at any existing similar products. Initially research is very basic in terms of like and dislike, but deeper research looks into aesthetics, functionality and the materials used. Pupils will expand their research skills to include these different areas and, ultimately, be able to link them to **users and purposes**.

Design Technology Vocabulary

The language of design technology can be broken down into different categories such as: the language of **design** e.g. draw, sketch, user, purpose; the language of **making**, for example, tools, equipment, materials and the language of **evaluation**, including discussion about the product, asking questions about its useability, reviewing and checking.

Product Features

Product features are aspects that make a product useful, fit for purpose and, sometimes, unique. They are attributes that appeal to **users** and make that particular product distinct. When designing a product, the features need to appeal to users, need to fulfil the purpose of the product and be influenced by research into products that may do the same thing. This aspect has strong links with **users and purposes** and **product research**. Pupils will learn how to identify features, discuss how useful they are and then explore how **product features** they actually benefit the product in terms of performance and usability.

Invention and Development

Design technology can be looked as two strands: **invention and development**. **Invention** is the process of thinking and making new products. The people who do this are **inventors**. **Development** looks at products and ideas that already exist and finds ways of making them better. It is important that pupils recognise that adapting and innovating designs / products is key in making new things. Initially, pupils will find out about well-known inventors and how their products and designs have improved life for others. They will learn about the need for problem-solving skills during the invention process, so that a product can be as functional and usable as possible. Pupils will also find out about copyrighting, trademarks and patenting ideas and products.

Design Technology

Dt1 Explore the sensory qualities of materials
 Dt2 Explore ways to construct models
 Dt3 Identify a target group for what they intend to design and make
 Dt4 Recognise how structures can be made, stronger, stiffer and more stable
 Dt5 Generate and talk about their own ideas
 Dt6 Follow safe procedures
 Dt7 Take account of simple properties of materials when deciding how to cut, shape, combine and join them
 Dt8 Use tools and materials with help

Dt9 Explore a range of existing products
 Dt10 Discover where foods come from in choosing, preparing and tasting different dishes
 Dt11 Identify a purpose for what they intend to design and make
 Dt12 Identify simple design criteria then plan what to do next, using a variety of methods
 Dt13 Observe and take account of properties of materials when deciding how to cut, shape, combine and join them
 Dt14 Identify what they could have done differently or how they could improve their work in the future
 Dt15 Evaluate a range of existing products
 Dt16 Communicate their ideas using a variety of methods e.g. drawing, making, mock-ups, ICT
 Dt17 Measure, mark, cut out and shape a range of materials
 Dt18 Use mechanisms in the products e.g. wheels, sliders
 Dt19 Use simple finishing techniques
 Dt20 Talk about their ideas, saying what they like and dislike, and evaluate against their design criteria

Knowledge Progression

Pathfinders 1 / Year 1

Happily Ever After

Pupils will be using The Extraordinaires Fairy project in this unit. They will be introduced to the 'persona' of the Fairy to help them think more like the end user who they are designing for. Pupils will work through the stages of the design process, from research, design, make and evaluation. They will need to research products that are already available on the market and then adapt their ideas to ensure they think of something original but useful and useable by the user they are designing for. Pupils will look at simple ways to improve their design and be introduced to ways in which they can analyse their work and also that of their peers.

Concepts

NC - Design purposeful, functional, appealing products for themselves and other users based on design criteria

Pathfinders 2 / Year 2

Land Ahoy / The Beachcombers

Pupils will be using The Extraordinaires Pirate project in this unit. They will be introduced to the 'persona' of the Pirate to help them think more like the end user who they are designing for. Pupils will work through the stages of the design process, from research, design, make and evaluation. They will need to research products that are already available on the market and then adapt their ideas to ensure they think of something original but useful and useable by the user they are designing for. Pupils will look at simple ways to improve their design and be introduced to ways in which they can analyse their work and also that of their peers.

Concepts

NC - Design purposeful, functional, appealing products for themselves and other users based on design criteria

Design Technology

- NC** - Generate, develop, model and communicate their ideas through talking, drawing, templates, mock-ups and, where appropriate, information and communication technology
- NC** - Select from and use a range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing)
- NC** - Select from and use a wide range of materials and components, including construction materials, textiles and ingredients, according to their characteristics
- NC** - Understand the important of exploring and evaluating a range of existing products
- NC** - Evaluate their ideas and products against design criteria
- Design and make a prototype of a bag suitable for the client (Fairy) to carry things in

ZERO TO HERO - The Gift

In this unit, pupils will design and make a gift for one of the famous people they have studied within the Zero to Hero unit. Pupils will need to consider the answers to three key questions in the design phase of their task:- Who is the gift for? How does the design and function of the gift suit the person it is intended for? Where and when might this person use this gift?

Concepts

- NC** - Design purposeful, functional, appealing products for themselves and other users based on design criteria
- NC** - Generate, develop, model and communicate their ideas through talking, drawing, templates, mock-ups and, where appropriate, information and communication technology
- NC** - Select from and use a wide range of materials and components, including construction materials, textiles and ingredients, according to their characteristics
- Design and make a useful gift for one of the famous people in the Zero to Hero unit

- NC** - Generate, develop, model and communicate their ideas through talking, drawing, templates, mock-ups and, where appropriate, information and communication technology
- NC** - Select from and use a range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing)
- NC** - Select from and use a wide range of materials and components, including construction materials, textiles and ingredients, according to their characteristics
- NC** - Understand the important of exploring and evaluating a range of existing products
- NC** - Evaluate their ideas and products against design criteria
- Design and make a prototype of a remote control suitable for the client (Pirate) to use.

UNITY IN THE COMMUNITY - Structures

Pupils will be introduced to how important design technology is to create strong and stable structures. They will observe a range of homes in relation to their local area and use what they have found to design and make a model of a home that a new neighbour would like to live in.

Skills Development Task

Concepts

- NC** - Select from and use a range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing)
- NC** - Build structures, exploring how they can be made stronger, stiffer and more stable
- Design, make and test a model house for a new neighbour

Knowledge Progression

Pathfinders 1 / Year 1

COME FLY WITH ME! ARCTIC CIRCLE - Mechanisms - Sliders and Levers 1

Pupils will develop skills needed in order to design and make a simple moving object, focusing on basic sliders and levers. They will be introduced to vocabulary such as mechanism, lever and slider and explore different ways these can be made with simple materials, tools and techniques. Pupils will be familiarised with some early safety tips such as asking adults to cut or slice cardboard with sharp knives or cutters.

Skills Development Task

Concepts

- NC** - Explore and use mechanisms (for example, levers, sliders, wheels and axles), in their products
- NC** - Design purposeful, functional, appealing products for themselves and other users based on design criteria
- NC** - Generate, develop, model and communicate their ideas through talking, drawing, templates, mock-ups and, where appropriate, information and communication technology
- NC** - Select from and use a range of tools and equipment to perform practical tasks
- NC** - Explore and use mechanisms (for example, levers, sliders, wheels and axles), in their products
- Design, make and evaluate a moving picture which uses a simple mechanism (slider or lever) and be made from card
- Design, make and evaluate a moving picture to accompany a fact sheet on an animal that lives in the Arctic.

INTER-NATION MEDIA STATION - Nan's Outfit - Additional Textiles

Pupils will explore some basic textile skills of cutting around a template, adding embellishments and stitching two pieces of fabric together in order to design a t-shirt or top for Nan, mentioned in the Part One literacy unit. They will initially need to design the top for Nan before making a prototype of their design.

Concepts

Pathfinders 2 / Year 2

LIGHT UP THE WORLD - Mechanisms - Sliders and Levers 2

Pupils will develop skills needed in order to design and make a simple moving object, focusing on basic sliders and levers. They will be introduced to vocabulary such as mechanism, lever and slider and explore different ways these can be made with simple materials, tools and techniques. Pupils will be familiarised with some early safety tips such as asking adults to cut or slice cardboard with sharp knives or cutters.

Skills Development Task

Concepts

- NC** - Design purposeful, functional, appealing products for themselves and other users based on design criteria
- NC** - Generate, develop, model and communicate their ideas through talking, drawing, templates, mock-ups and, where appropriate, information and communication technology
- NC** - Select from and use a range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing)
- NC** - Explore and use mechanisms (for example, levers, sliders, wheels and axles), in their products
- Design and make a pop-up leaflet to help explain the importance of sun safety.

GOING WILD - Textiles

In this area of design technology, pupils will be familiarised with a range of fabrics and how they can be joined together with both glue and with needle and thread. Pupils will learn how to create simple stitches to join 2 pieces of fabric together and then add other materials to create features. They will need to think about what they are making so that it relates to the brief.

Design Technology

NC - Design purposeful, functional, appealing products for themselves and other users based on design criteria

NC - Select from and use a range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing)

NC - Select from and use a wide range of materials and components, including construction materials, textiles and ingredients, according to their characteristics

- Design and make a T-shirt or top for Nan to wear on her big day out

Skills Development Task

Concepts

NC - Select from and use a range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing)

NC - Select from and use a wide range of materials and components, including construction materials, textiles and ingredients, according to their characteristics

- Design and make finger puppets for the nursery rhyme, 'Two Little Sparrows'

Knowledge Progression

Pathfinders

ONE DAY, MANY WAYS – Food Technology

In this unit, pupils will apply what they have learnt about balanced diets and dishes in science to taste and then make some different breakfasts from around the world. Pupils will need to think about where different ingredients come from and how they need to prepare them. They will learn about some simple cooking techniques, food hygiene and kitchen safety.

Concepts

- To know how to use the basic principles of a healthy and varied diet to prepare dishes
- To know that different countries and cultures eat different foods for breakfast

SKIP OF THE DUMP - Mechanisms - Sliders and Levers 2

Pupils will develop skills needed in order to design and make a simple moving object, focusing on basic sliders and levers. They will be introduced to vocabulary such as mechanism, lever and slider and explore different ways these can be made with simple materials, tools and techniques. Pupils will be familiarised with some early safety tips such as asking adults to cut or slice cardboard with sharp knives or cutters.

Skills Development Task

Concepts

NC - Design purposeful, functional, appealing products for themselves and other users based on design criteria

NC - Generate, develop, model and communicate their ideas through talking, drawing, templates, mock-ups and, where appropriate, information and communication technology

NC - Select from and use a range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing)

NC - Explore and use mechanisms (for example, levers, sliders, wheels and axles), in their products

- Design and make a pop-up leaflet to help explain the importance of sun safety.

FOOD TECHNOLOGY

Pupils will make and bake bread using a simple bread roll recipe. They will also learn about how bread was baked in the past and learn about various breads from around the world. They will learn that bread today can be made both using traditional methods or by using a bread maker.

NC - Understand where food comes from

Additional Food Technology

Happily Ever After – Within Maths, the pupils will measure and weigh ingredients to make biscuits to take to Grandma's house in Little Red Riding Hood.

PSHE - see table below

Design Technology

Food Technology within PSHE

Pathfinders

Design Technology - Cooking and Nutrition

- Use the basic principles of a healthy and varied diet to prepare dishes (NC)
- Understand where food comes from (NC)

Core 1 Unit 1 Lesson 1: Healthy Eating – Vote Green!

Concepts

- Learn about where vegetables and fruit grows
- Understand the social aspect of eating food together
- Know that making good choices about food will improve their health and well-being

Core 1 Unit 1 Lesson 2: Healthy Eating - Meat Eaters (within Come Fly With Me! Arctic Circle)

Concepts

- Know what constitutes a healthy diet (including understanding calories and other nutritional content)
- Understand the need for protein as part of a balanced diet
- Recognise which types of food are healthy
- Know how to make simple choices that improve their health and wellbeing

Core 1 Unit 1 Lesson 3: Healthy Eating - Party Time!

Concepts

- Know the principles of planning and preparing a range of healthy meals
- Apply their knowledge of healthy eating to plan a menu for a themed party

Key Vocabulary

Design Technology

Dt21 Generate, develop and explain ideas for products to meet a range of needs
 Dt22 Explore ways of meeting design challenge with a food focus using a range of cooking techniques
 Dt23 Identify a purpose and establish criteria for a successful product
 Dt24 Evaluate work, adapting and improving where appropriate
 Dt25 Communicate, design ideas in different ways e.g. discussion, annotated sketches, cross-sectional diagrams and prototypes
 Dt26 Selecting appropriate tools and techniques, name and describe them
 Dt27 Measure, mark, cut out and shape a range of materials and assemble, join and combine components and materials with some accuracy

Dt28 Use research to inform their design
 Dt29 Explore ways of meeting design challenges with a textile focus
 Dt30 Evaluate work, adapting and improving through the views of others to improve their work
 Dt31 Communicate design ideas, in different ways e.g. discussion, annotated sketches, cross-sectional diagrams and prototypes
 Dt32 Select from and use a range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities
 Dt33 Join and combine materials and components accurately in temporary and permanent ways
 Dt34 Measure, mark, cut out and shape a range of materials and assemble, join and combine components and materials with increasing accuracy

Knowledge Progression

Adventurers 1 / Year 3

Lightning Speed

Pupils will be using The Extraordinaires Evil Genius project in this unit. They will be familiar with the initial processes of studying the persona of the user, their needs analysis and what it is they are designing. In Adventurers, pupils will be expected to work through the stages in more detail, for example, when thinking of ways to improve, they will need to analyse a specific feature of their design and describe how it could be made better. Pupils will need to consider how they will make their product not only functional but also look attractive to the user.

Concepts

- NC** - Use research and develop design criteria to inform the design of innovative, functional, appealing products that are fit for purpose, aimed at particular individuals or groups
- NC** - Generate, develop, model and communicate their ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design
- NC** - Select from and use a wider range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing) accurately

Adventurers 2 / Year 4

Under The Canopy

Pupils will be using The Extraordinaires Tribal Child project in this unit. They will be familiar with the initial processes of studying the persona of the user, their needs analysis and what it is they are designing. In Adventurers, pupils will be expected to work through the stages in more detail, for example, when thinking of ways to improve, they will need to revisit the user's profile and assess how their design could be made more suitable. Pupils need to think carefully about the materials being used with links to functionality and aesthetics.

Concepts

- NC** - Use research and develop design criteria to inform the design of innovative, functional, appealing products that are fit for purpose, aimed at particular individuals or groups
- NC** - Generate, develop, model and communicate their ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design
- NC** - Select from and use a wider range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing) accurately

|--|---|
| Adventurers 1 / Year 3 | Adventurers 2 / Year 4 |
| <p>ATHENS VS SPARTA - Mechanisms - Structures</p> <p> In Pathfinders, pupils learnt that good design is an importance component in the construction of strong structures. In this unit, pupils will discover how a strong structure and an accurate mechanism can be combined to make a siege weapon. Pupils will need to carefully consider the purpose of their product and include some key features to allow it to work. They will also need to work through processes of problem solving in order to achieve the best firing mechanism.</p> <p>Skills Development Task</p> <p>Concepts</p> <p>NC - Select from and use a wider range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing) accurately</p> <p>Apply their understanding of how to strengthen, stiffen and reinforce more complex structures</p> <ul style="list-style-type: none"> Design, make and evaluate a siege weapon (trebuchet) | <p>PICTURE OUR PLANET - Textiles</p> <p> Pupils already have some experience of working with textiles and combining two pieces of materials together using needle and thread. In this unit, pupils will need to use sewing skills to make a soft toy, therefore they will learn how to use stuffing to pad out two pieces of fabric. They will also need to consider how their toy looks as well as being robust enough for a toddler to play with.</p> <p>Skills Development Task</p> <p>Concepts</p> <p>NC - Generate, develop, model and communicate their ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design</p> <p>NC - Select from and use a wider range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing) accurately</p> <p>NC - Select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities</p> <p>NC - Investigate and analyse a range of existing products</p> <ul style="list-style-type: none"> Design and make an animal soft toy, aimed at toddlers, in association with the Scottish Wildlife Trust |
| <p>COME FLY WITH ME! AFRICA - Food Technology</p> <p> This unit focuses on food technology. Pupils will expand their understanding of where food comes from by recognising that a lot of food products come from African countries, and they will look at Fairtrade as an organisation that ensures farmers and growers get a fair price for their produce. Pupils will learn how to prepare and make a range of African inspired dishes. They will need to consider hygiene and safety when using heat sources and also think about how their food is presented from a design technology perspective.</p> <p>Concepts</p> <p>NC - Select from and use a wider range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing) accurately</p> | <p>PICTURE OUR PLANET - Food Technology</p> <p> Pupils will learn about the history of the traditional Scottish sweet, Tablet. They will need to follow the recipe provided and then experiment with different flavours to make it individual to them. They will take feedback on their creations, and this could then be expanded to selling their flavoured table at a later date.</p> <p>Concepts</p> <p>NC - understand and apply the principles of a healthy and varied diet</p> <ul style="list-style-type: none"> To make the traditional Scottish sweet, tablet |

Design Technology

NC - Select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities

NC - Prepare and cook a variety of predominantly savoury dishes using a range of cooking techniques

NC - Understand seasonality and know where and how a variety of ingredients are grown, reared, caught and processed

- To learn some basic cooking skills

Concepts

NC - Generate, develop, model and communicate their ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design

NC - Select from and use a wider range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing) accurately

NC - Select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities

NC - Investigate and analyse a range of existing products

OPERATION PIED PIPER – Structures

Pupils will design and make their own version of a WWII Anderson shelter. They need to select materials and join them effectively to meet the needs criteria which includes strength and waterproofing. They will need to consider the original design and think of ways it could be improved

Food Technology within PSHE

Adventurers

Design Technology - Cooking and Nutrition

- Understand and apply the principles of a healthy and varied diet (NC)
- Prepare and cook a variety of predominantly savoury dishes using a range of cooking techniques (NC)
- Understand seasonality, and know where and how a variety of ingredients are grown, reared, caught and processed (NC)

Core 1 Unit 3 Lesson 1: A Balanced Diet – Plant or Animal (within Come Fly with Me! Africa)

- Know what constitutes a healthy diet (including understanding calories and other nutritional content)
- Know where different foods come from

Core 1 Unit 3 Lesson 2: A Balanced Diet – Balancing Act (within Come Fly with Me! Africa)

- Know what constitutes a healthy diet (including understanding calories and other nutritional content)
- Know about and understand the function of different food groups for a balanced diet

Core 1 Unit 3 Lesson 3: Working With Food – Master Chef

Concepts

- Know the principles of planning and preparing a range of healthy meals

Core 1 Unit 3 Lesson 4: Working With Food – Our Food Hall

Concepts

- Learn to prepare and cook a variety of dishes

Design Technology

Dt35 Investigate ways of meeting design challenges with a construction focus
 Dt36 Investigate how the work of individuals in design and technology has helped to shape the world
 Dt37 Identify users' views and take these into account
 Dt38 Analyse a range of existing products
 Dt39 Estimate and measure using appropriate instruments and units
 Dt40 Plan what they have to do, including how to use materials, equipment and processes
 Dt41 Communicate design ideas in different ways e.g. discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer aided design
 Dt42 Apply knowledge of mechanical and electrical control when designing and making functional products
 Dt43 Refine sequences of instructions to control events or make things happen

Dt44 Explore alternative ways of making their product, if first attempts fail
 Dt45 Check work as it develops and modify as necessary
 Dt46 Evaluate their products, identifying strengths and areas for development, and make appropriate changes
 Dt47 Draw on and use various sources of information, including ICT sources
 Dt48 Generate and clarify ideas for products, considering intended purpose
 Dt49 Plan what they have to do, suggesting a sequence of actions and alternatives if needed
 Dt50 Choose how to communicate design ideas as they develop, considering use and purpose
 Dt51 Select from a wide range of tools and equipment to perform practical tasks accurately

Knowledge Progression

Navigators 1 / Year 5

You're Not Invited

Pupils will be using The Extraordinaires Soldier project in this unit. Pupils will have extensive experience of the processes involved in researching, designing, making and evaluating for a range of products for a variety of users. In this unit, pupils are required to consider the needs of a real-life Extraordinaire. They will need to think about the impact their product has beyond its intended purpose; how will work with the rest of the Soldier's equipment? Pupils will also need to address the relationship between the product's features and its functionality.

Concepts

- NC** - Use research and develop design criteria to inform the design of innovative, functional, appealing products that are fit for purpose, aimed a particular individuals or groups
- NC** - Generate, develop, model and communicate their ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design
- NC** - Select from and use a wider range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing), accurately
- NC** - Select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities

Navigators 2 / Year 6

Mission Control

Pupils will be using The Extraordinaires Spaceman project in this unit. Pupils will have extensive experience of the processes involved in researching, designing, making and evaluating for a range of products for a variety of users. In this unit, pupils are required to consider the needs of a real-life Extraordinaire. They will need to think about the impact their product has beyond its intended purpose; how will work with the rest of the Spaceman's equipment and in his limited workspace? Pupils will also need to address the relationship between the product's features and its functionality.

Concepts

- NC** - Use research and develop design criteria to inform the design of innovative, functional, appealing products that are fit for purpose, aimed a particular individuals or groups
- NC** - Generate, develop, model and communicate their ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design
- NC** - Select from and use a wider range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing), accurately
- NC** - Select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities

Design Technology

- NC - Investigate and analyse a range of existing products
- NC - Evaluate their ideas and products against their own design criteria and consider the views of others to improve their work
- Design and make a sleeping place suitable for a soldier

A World Of Bright Ideas

Pupils will be introduced to new vocabulary and understand how important patent, trademark and copyright are in the invention and development of products. They will compare brand names and logos; recognising that a memorable logo is a great way of encouraging people to remember a brand or product.

Concepts

NC- Understand how key events and individuals in design and technology have helped shape the world

- To understand the meaning of the term 'copyright' and learn about why it is important
- To know about and understand what a patent is
- To know about and understand what a trademark is
- To design a new brand for a range of greetings cards

- NC - Investigate and analyse a range of existing products
- NC - Evaluate their ideas and products against their own design criteria and consider the views of others to improve their work
- Design and make a model of a time-keeping device suitable for a spaceman

I HAVE A DREAM - Textiles

Pupils will draw on the knowledge and skills learn in previous pathways to create a useable and aesthetically pleasing textile product. They will use sewing skills to join more than one piece of fabric together using more complex stitches, as well as have potential opportunity to use a sewing machine. They will need to stuff and secure their cushion so that it is comfortable for someone to use.

Skills Development Task

Concepts

NC - Generate, develop, model and communicate their ideas through discussion, annotated sketches, cross-sectional and exploded diagrams, prototypes, pattern pieces and computer-aided design

NC - Select from and use a wider range of materials and components, including construction materials, textiles and ingredients, according to their functional properties and aesthetic qualities

- Make a cushion following a pattern

Knowledge Progression

Navigators 1 / Year 5

WARS OF THE WORLD/CLASH OF THE TITANS - Electronics 1

Through science, pupils have experimented with designing, making and testing a range of electrical circuits with different components. Now, they will implement this knowledge and these skills to produce a circuit that has a clear purpose. Pupils will need to consider the features of their circuit and how it relates to its functionality. They will also address that their design has impact in other ways.

Skills Development Task

Concepts

NC - Understand and use electrical systems in their products (for example, series circuits incorporating switches, bulbs, buzzers and motors)

NC - Apply their understanding of computing to program, monitor and control their products

- Design, make and evaluate a device to send Morse Code signals

COME FLY WITH ME! AMERICA – Dreamcatcher

Pupils will sketch, design using annotations and then make a dreamcatcher using models and video presented to them as inspiration. They will find out about the origins of the dreamcatcher and recognise some of the key design features needed. Before making, pupils will need to identify the materials and colours they will use.

Mechanisms - Structures 1

Previously, pupils have learnt how specific mechanisms play a role in constructing strong and useful structures. In this unit, pupils will work through several processes to initially build a strong frame and then join these frames together to form a bridge. Pupils will be required to consider not only their design but also the materials, tools and techniques they will use in order to complete their project.

Skills Development Task

Concepts

NC - Select from and use a wider range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing), accurately

NC - Apply their understanding of how to strengthen, stiffen and reinforce more complex structures

- Create a frame structure

Navigators 2 / Year 6

FULL OF BEANS / TOO HOT TO HANDLE - Electronics 2

Through science, pupils have experimented with designing, making and testing a range of electrical circuits with different components. Now, they will implement this knowledge and these skills to produce a circuit that has a clear purpose. Pupils will need to consider the features of their circuit and how it relates to its functionality. They will also address that their design has impact in other ways.

Skills Development Task

Concepts

NC - Understand and use electrical systems in their products (for example, series circuits incorporating switches, bulbs, buzzers and motors)

NC - Apply their understanding of computing to program, monitor and control their products

- Design, make and evaluate a traffic control system

A WORLD OF BRIGHT IDEAS - Mechanisms - Structures 2

Pupils will now use their advanced knowledge of frames and structures to build a 'racer' vehicle with a strong, stable structure and a motor powered by a simple electrical circuit. Pupils will be required to consider not only their design but also the materials, tools and techniques they will use in order to complete their project.

Skills Development Task

Concepts

NC - select from and use a wider range of tools and equipment to perform practical tasks (for example, cutting, shaping, joining and finishing), accurately

NC - Understand and use mechanical systems in their products (for example, gears, pulleys cams, levers and linkages)

NC - Understand and use electrical systems in their products (for example, series circuits incorporating switches, bulbs, buzzers and motors)

- Design, make and evaluate a three wheeled 'racer'

Join up frames to create a bridge

Design Technology - Cooking and Nutrition

- Understand and apply the principles of a healthy and varied diet (NC)
- Prepare and cook a variety of predominantly savoury dishes using a range of cooking techniques (NC)
- Understand seasonality, and know where and how a variety of ingredients are grown, reared, caught and processed (NC)

Core 1 Unit 2 Lesson 1: Food Choices – Secret Eaters

Concepts

- Know what constitutes a healthy diet (including understanding calories and other nutritional content)
- Know about the different food groups and their related importance as a part of a balanced diet
- Develop an awareness of their own dietary needs

Core 1 Unit 2 Lesson 2: Food Choices – Invention Team (within A World of Bright Ideas)

- Know the principles of planning and preparing a range of healthy meals

Core 1 Unit 2 Lesson 3: Cooking – Michelin Stars (within A World of Bright Ideas)

- Know what constitutes a healthy diet (including understanding calories and other nutritional content)
- Know how to cook and apply the principles of nutrition and healthy eating
- Prepare and cook with a variety of ingredients, using a range of cooking techniques

End Goals

Explorers / EYFS

Our aim in teaching design technology in Explorers is to inspire pupils to not only be creative but create for a purpose. Pupils should be aware that when they are designing and making, they need to think about it is they are making and the reasons why they are making it; what is the purpose? In this phase, pupils will have had opportunity to carry out some basic product research by pointing out some of the key features of a product, such as in Help Is At Hand knowing that a lanyard requires a photograph and the name of the person. They should also be able to give some simple feedback and evaluation by stating whether they like or dislike a product. Pupils should be able to name the tools and materials they are using to make their designs and recognise some techniques of how they are constructing their models. Explorers should also have had an introduction to the role of inventors as people who invent useful products and that they don't always succeed first time; they often have to try numerous times before they get their product right.

Pathfinders / KS1

Our aim in teaching design technology in Pathfinders is to broaden pupils' awareness of designing for purpose. By the end of this phase, pupils should recognise that inventors and designers are not designing for themselves, they are designing for end users. This can be one person, as the pupils will have experienced with their first Extraordinaires projects, or it can be for a large group of people. Pupils should be able to carry out some research into existing products and use this to guide their own designs noting useful features. As well as learning about designing for a more focused purpose, pupils should have started to be aware of a range of skills and techniques that will help them when it comes to modelling their designs. They should recognise the importance of using suitable materials and notice how some everyday objects can be used to make effective mechanisms. Pupils should be aware that models of their designs may require testing, especially if there are moving parts and adjustments may need to be made to make them work efficiently. Evaluative vocabulary should be extended beyond 'like' and 'dislike' with comment on how their work could be improved or note features that are particularly pleased with.

Adventurers / LKS2

Our aim in teaching design technology in Adventurers is to encourage pupils to make links between purpose, functionality and aesthetics. In this phase, pupils will have the opportunity to design for two more Extraordinaires. These personas require more thought and consideration of their requirements than in Pathfinders. Pupils should know that they need to not only focus on purpose and some key features but now bear in mind how the product looks and feels for their user. They should consider materials that not only work well for construction but look aesthetically pleasing too.

The Adventurers phase sees pupils learn some basic cooking skills and recognition of where their food comes from. Pupils should be aware that much of their food comes from overseas and that seasonality is important when trying to source various ingredients. They should know how to prepare food hygienically and cook safely whilst remembering that food, like other products they have designed and made, needs to be presented attractively for people to enjoy.

By the end of this phase, pupils should be more confident in evaluating their own work and be able to give more detailed criticism, both positively and negatively. They should understand the importance of problem solving in the invention process and be able to make adjustments to their designs. Pupils should now be able to give some feedback to their peers, suggesting ways they could improve or noting a feature that is particularly well designed.

Design Technology

Navigators / UKS2

Our aim in teaching design technology in Navigators is to embed knowledge and skills from the previous phases with a greater awareness of design in the wider world. Pupils should be aware that products can often have more than one function or purpose and be able to recognise the impact this has on its useability. They should know that there is a clear relationship with the features of a product and the functionality of it. They should ask themselves regularly, does this feature enhance this product? Is this feature necessary to the needs of the end user?

The Navigator Extraordinaires are based on real people; a soldier and a spaceman, both of whom have very specific requirements and restrictions. Pupils should be able to consider the wider issues these personas have when designing and making their products for them. Thoughts on how versatile their product is and how it could impact on other equipment should be considered.

By the end of this phase, pupils should have an awareness of the legalities that comes with designing and making a unique product. They should know the terms of 'trademark', 'patent', 'copyright', 'brand' and 'logo'. They should understand that these terms and processes allow inventors to keep their inventions safe and ensure that they earn the recognition they deserve for a design that is their own work. Additionally, Navigators, should be able to see the links between design technology and other subjects such as science. They should see that their knowledge of electricity, for example, can be put to practical use in technology tasks.
